PROFESSIONAL SUMMARY

Full-stack developer combining no-code/low-code efficiency with custom engineering. I build scalable web applications and AI-driven systems using GenAI, RAG pipelines, and real-world data integrations. I ship products that actually solve problems, rather than just building demos.

TECHNICAL SKILLS

Machine Learning & Data Science: Python • LLM Integration • RAG Pipelines • Prompt Engineering • Scikit-Learn • NumPy • Pandas • Model Evaluation • Feature Engineering •

Embeddings • Vector Search • Regression & Classification

Backend & APIs: Node.js • Express • Django • Django REST • Flask • REST APIs • OpenAI API

Frontend: React • Tailwind • HTML • CSS

Databases: MongoDB • SQL • Bubble Database

No-Code & Integrations: Bubble.io • Plugin Development • Microsoft Graph • Daily.co • Calendly • Stripe

PROFESSIONAL EXPERIENCE

Bubble Developer - Hotsourced - Remote (London, UK) | April 2026 – Present

Bubble Developer (Lead) | AI Engineer (Applied AI & RAG)

Vings Technologies - Remote (CA, US) | Aug 2024 – March 2026

Leading development of an AI-driven hiring and assessment platform, contributing across both AI system engineering (Python) and product platform development (Bubble + integrations).

AI Engineering Contributions (Python / AI stack)

- Built a production conversational AI interviewer agent (CELIA) using the Pipecat pipeline, FastAPI, and hosted model infrastructure with container snapshot loading for low-latency sessions.
- Designed and implemented a RAG pipeline for intelligent candidate profile search using embeddings and vector retrieval.

Platform & Product Engineering (Bubble + APIs)

- Architected a configurable AI Assessment Engine supporting text, video, and hybrid interviews with dynamic question generation, automated evaluation, and feedback reports.
- Integrated Daily.co for live interviews with recording, transcription, and AI-generated summaries.
- Implemented Microsoft Graph API integrations to surface candidate-company email engagement insights.
- Designed and shipped real-time scheduling workflows using Calendly APIs and interviewer availability logic.
- Built onboarding and role-based workflows for candidates, interviewers, and companies.
- Engineered a modular billing system with pricing plans, offers, and date-based controls.

ConnectiumAI, an AI-driven platform where conversations become verifiable proof of skills.

Bubble.io Developer – Freelance | June 2023 – Present

- **CMG Compass:** Built a prototype/MVP business assessment system with domain-based COMPASS evaluation and financial analysis using NAICS benchmarks. Integrated Claude AI to generate structured reports and summaries, and added Stripe for one-time purchases and subscription plans. The platform is currently being tested for user feedback before scaling and feature expansion.
- **Noob:** Implemented audio messaging functionality; redesigned the landing page and built an additional page based on Figma designs; applied numerous UI/UX improvements and minor fixes

- **BookDeskriptor:** Integrated OpenAI API to generate book descriptions and titles with two distinct modes (Generate and Generate++). Added plan-based usage limits and redesigned key pages for improved user experience.
- **SmrtCoach:** Delivered a coaching SaaS platform with SmrtAssessment chat, session scheduling, event management, To-Do tools, and OpenAI-integrated learning modules.
- **Kathy:** Developed an AI-powered real estate listing platform. Used OpenAI's ChatGPT 3.5 via API to auto-generate high-quality property descriptions.
- **KochiFitness:** Built a robust coaching platform with one-on-one chat, video conferencing, and "Kochi Konnect," a creator hub for managing user-generated content and services.
- **Plugin Development:** Created and published Bubble.io plugins, including a Unique ID Generator plugin and a Copy to Clipboard plugin.
- **Other Projects & Maintenance:**
 - Executed over a dozen client engagements—ranging from feature builds and UI enhancements to bug fixes and performance optimizations.
 - Provided rapid turnaround for outsourced debugging tasks, fixing bugs and API integrations.
 - Collaborated with cross-functional teams to scope requirements, prototype solutions, and ensure seamless deployment.

Full Stack Developer – Freelance | Feb 2023 – Present

- Developed a full-stack web app for a contracting business using React, Django REST, and Tailwind CSS. The platform streamlines operations with dynamic service listings, project showcases, inquiry management, and an admin dashboard for content control. It also features a public bill-making tool, enabling quick and accessible bill generation for users. [[Farukhsons Enterprises](#)]
- Developed "Posttrex" – a social media web app. [[Posttrex](#)]
- Created a basic static website for a interior designing business using HTML, Tailwind CSS and JavaScript. [[Shagoo Designs](#)]

Flutterflow Developer – Freelance | Feb 2024 – Jun 2024

EDUCATION

Certification – Data Science, CodeWithHarry | April 2025 – November 2025

Bachelor of Computer Applications (BCA), CASET College of Science and Engineering, Srinagar | Oct 2022 – 2025

Certification – Full Stack Development, Softstacks Technologies Pvt. Ltd. | Dec 2020 – Jul 2021

LANGUAGES & INTERESTS
